

1. Novelty eyewear comprising:

- (a) an eye patch having a viewing aperture formed therein;
- (b) outer adhesive surface portions formed upon said eye patch for supporting an optical element over said viewing aperture while the patch is being worn by a user; and
- (c) inner adhesive surface portions formed upon said eye patch for supporting the eye patch against facial portions of the user.

2. The eye patch of claim 1 wherein said eye patch is templeless and strapless and comprises flexible sheet means.

3. Novelty eyewear comprising:

- (a) an eye patch having outer adhesive surface portions and a viewing aperture formed therein;
- (b) an optical element aligned with an eye of the wearer having peripheral portions thereof attached to said outer adhesive surface portions; and
- (c) wherein said eye patch has inner surface portions enabling said eye patch to be attached to facial portions of said wearer for supporting said optical element over said eye.

4. The eye patch of claim 3 wherein said optical element comprises a corrective lens.
5. The eye patch of claim 4 wherein said corrective lens is a lens made in accordance with an outdated prescription that would otherwise be discarded.
6. The eye patch of claim 3 wherein said eye patch is templeless and strapless and comprises flexible sheet means.
7. The eye patch of claim 4 wherein said eye patch is templeless and strapless and comprises flexible sheet means.
8. The eye patch of claim 5 wherein said eye patch is templeless and strapless and comprises flexible sheet means.
9. A method of enhancing conviviality of persons in a social atmosphere comprising the steps of:
  - (a) providing said persons with at least one eye patch for supporting an optical element, enabling said persons to see through the eye patch and optical element thereon while wearing said eye patch; and
  - (b) attaching said eye patch to facial portions of said persons, enabling viewing through said optical element during activities performed within said social atmosphere.

10. The method of claim 9 wherein said optical element comprises a corrective lens and including the step of affixing said corrective lens to said eye patch.
11. The method of claim 10 wherein said optical element comprises an old corrective lens made in accordance with an outdated prescription.
12. The method of claim 9 wherein step (b) is performed by pressing an inner adhesive surface of said eye patch against facial portions of said persons.
13. The method of claim 10 wherein step (b) is performed by pressing an inner adhesive surface of said eye patch against facial portions of said persons.
14. The method of claim 11 wherein step (b) is performed by pressing an inner adhesive surface of said eye patch against facial portions of said persons.
15. The method of claim 9 including affixing a message upon outer surface portions of said eye patch that can enhance sociability.
16. The method of claim 10 including affixing a message upon outer surface portions of said eye patch that can enhance sociability.
17. The method of claim 11 including affixing a message upon outer surface portions of said eye patch that can enhance sociability.

18. The method of claim 12 including affixing a message upon outer surface portions of said eye patch that can enhance sociability.
19. The method of claim 13 including affixing a message upon outer surface portions of said eye patch that can enhance sociability.
20. The method of claim 14 including affixing a message upon outer surface portions of said eye patch that can enhance sociability.
